

Christine Harada is a climate and impact investing expert. Christine has over 20 years of success in leading government and management consulting organizations. She has extensive expertise in business strategy and translating that into operational excellence.

Christine is currently the VP of Government Affairs at Heliogen, a renewable energy technology company unlocking the power of sunlight to replace fossil fuels. Before this role, she was President of i(x) investments, a permanently capitalized holding company that invests in the critical areas of human need (renewable energy, green real estate development, affordable housing, gender equality, technology and information, waste reduction and food and agriculture) in a multi-strategy investment approach throughout the entire capital structure. Ms. Harada also served as the Federal Chief Sustainability Officer for the Obama administration. In this role, she provided oversight for all sustainability-related initiatives across the federal government in energy, fleet, and acquisitions-game-changing improvements that added to our nation's clean energy future.

Ms. Harada has over 20 years of success in leading government and management consulting organizations. She has extensive expertise in business strategy and translating that into operational excellence. Ms. Harada's private sector experience includes over 10 years in management consulting with the Boston Consulting Group and Booz Allen Hamilton; and building satellites while at Lockheed Martin. She is also a Fellow with the Los Angeles CleanTech Incubator.

Ms. Harada holds an MA, International Studies and an MBA, Finance, respectively, from the Lauder Institute and the Wharton School at the University of Pennsylvania. She also holds an MS Aeronautics/Astronautics and a BS Aeronautics/Astronautics, respectively, from Stanford University and the Massachusetts Institute of Technology.
