

Francis Doumet

Francis is CEO & Co-Founder of Metaspectral, which leverages AI to analyze ultra-high-resolution data in milliseconds instead of hours for the defense, aerospace, manufacturing, and agricultural sectors. Metaspectral's technology, for instance, enables recycling plants to sort between previously indistinguishable materials and increase the quality of the final recycled material. Previously, Francis was CEO of Adenda, where he developed next-generation messaging tools for mobile operators. Francis also co-founded Catapult Design, a non-profit design consultancy providing engineering support to organizations in need of socially empowering technologies, which was awarded a National Design Award from the Cooper Hewitt, Smithsonian Design Museum in 2020. Francis holds 4 patents, a Masters in Engineering from Stanford University, and an MBA from the Wharton School of Business and an MA in International Studies from University of Pennsylvania/Lauder Institute.
